

SS.K.13. Content Anchor Standard: Create Geographic Representations Create a route to a specific location using maps, globes, and other simple geographic models.	SS.K.14. Content Anchor Standard: Evaluate Human Environment Interaction Compare environmental characteristics in Iowa with other places.	SS.K.15. Content Anchor Standard: Analyze Human Population Movement and Patterns Explain why and how people move from place to place.
SS.1.16. Content Anchor Standard: Create Geographic Representations Using maps, globes, and other simple geographic models, compare and contrast routes for people or goods that consider environmental characteristics.	SS.1.17. Content Anchor Standard: Evaluate Human Environment Interaction Describe how environmental characteristics and cultural characteristics impact each other in different regions of the U.S.	SS.1.18. Content Anchor Standard: Analyze Human Population, Movement, and Patterns Use a map to detail the journey of particular people, goods, or ideas as they move from place to place.

SS.1.19. Content Anchor Standard: Analyze Human Population, Movement, and Patterns Compare how people in different types of communities use goods from local and distant places to meet their daily needs.	SS.2.16. Content Anchor Standard: Create Geographic Representations Using maps, globes, and other simple geographic models, evaluate routes for people or goods that consider environmental characteristics.	SS.2.17. Content Anchor Standard: Evaluate Human Environment Interaction Explain how environmental characteristics impact the location of particular places.
SS.2.18. Content Anchor Standard: Analyze Human Population Movements and Patterns Describe how the choices people make impact local and distant environments.	SS.3.19. Content Anchor Standard: Create Geographic Representations Create a geographic representation to explain how the unique characteristics of a place affect migration.	SS.3.20. Content Anchor Standard: Evaluate Human Environment Interaction Describe how cultural characteristics influence people's choices to live in different regions of the U.S.

SS.3.21. Content Anchor Standard: Analyze Human Population Movements and Patterns Use map evidence to explain how human settlements and movements relate to the locations and use of various regional landforms and natural resources.	SS.4.17. Content Anchor Standard: Create Geographic Representations Create a geographic representation to illustrate how the natural resources in an area affect the decisions people make.	SS.4.18. Content Anchor Standard: Evaluate Human Environment Interaction Describe how environmental and cultural characteristics influence population distribution in specific places and regions.
SS.4.19. Content Anchor Standard: Analyze Human Population Movement and Patterns Explain influences on the development and decline of different modes of transportation in U.S. regions.	SS.5.19. Content Anchor Standard: Create Geographic Representations Create geographic representations to illustrate how cultural and environmental characteristics of a region impacted a historical event.	SS.5.20. Content Anchor Standard: Analyze Human Population Movements and Patterns Analyze how rules and laws encourage or restrict human population movements to and within the United States of America.

SS.6.16. Content Anchor Standard: Create Geographic Representations Utilize and construct geographic representations to explain and analyze regional, environmental, and cultural characteristics.	SS.6.17. Content Anchor Standard: Evaluate Human Environment Interaction Analyze and explain the cultural, physical, and environmental characteristics of places and regions and how this affects the life of the people who live there.	SS.6.18. Content Anchor Standard: Analyze Human Population Movements and Patterns Explain how changes in transportation, communication, and technology influence the movement of people, goods, and ideas in various countries.
SS.6.19. Content Anchor Standard: Analyze Global Interconnections Explain how global changes in population distribution patterns affect changes in land use in particular countries or regions.	SS.7.21. Content Anchor Standard: Analyze Human Population Movements and Patterns Evaluate the push and pull factors involved in human population movement and patterns.	SS.7.22. Content Anchor Standard: Analyze Global Interconnections Explain how the relationship between the environmental characteristics of places and production of goods influences the spatial patterns of world trade.

SS.7.23. Content Anchor Standard: Analyze Global Interconnections Explain how global changes in population distribution patterns affect changes in land use in particular areas.	SS.8.18. Content Anchor Standard: Evaluate Human Environment Interaction Explain how the physical and human characteristics of places and regions influence culture.	SS.8.19. Content Anchor Standard: Analyze Human Population Movements and Patterns Explain how push and pull factors contributed to immigration and migration in early American history.
SS.8.20. Content Anchor Standard: Analyze Global Interconnections Explain how global interconnections influenced early American history.	SS-Geo.9-12.13. Content Anchor Standard: Create Geographic Representations Employ maps to display and explain the spatial patterns of human and environmental characteristics.	SS-Geo.9-12.14. Content Anchor Standard: Create Geographic Representations Integrate multiple geographic representations to explain relationships between the locations of places and regions and their political, cultural, and economic dynamics.

SS-Geo.9-12.15. Content Anchor Standard: Create Geographic Representations Use geographic data to analyze variations in the spatial patterns of human and/or environmental characteristics at multiple scales.	SS-Geo.9-12.16. Content Anchor Standard: Evaluate Human Environment Interaction Analyze relationships and interactions within and between human and physical systems to explain reciprocal decisions.	SS-Geo.9-12.17. Content Anchor Standard: Evaluate Human Environment Interaction Analyze how environmental and cultural characteristics of various places and regions influence political and economic decisions.
SS-Geo.9-12.18. Content Anchor Standard: Evaluate Human Environment Interaction Evaluate the impact of human settlement activities on the environmental and cultural characteristics of specific places and regions.	SS-Geo.9-12.19. Content Anchor Standard: Analyze Human Population Movement and Patterns Analyze the reciprocal relationship between historical events and the spatial diffusion of ideas, technologies, cultural practices and the distribution of human population.	SS-Geo.9-12.20. Content Anchor Standard: Analyze Human Population Movement and Patterns Assess the impact of economic activities and political decisions on urban, suburban, and rural regions.

SS-Geo.9-12.21. Content Anchor Standard: Analyze Global Interconnections Analyze how changes in the environmental and cultural characteristics of a place or region influence spatial patterns of trade and land use.	SS-Geo.9-12.22. Content Anchor Standard: Analyze Global Interconnections Evaluate how economic globalization and the expanding use of scarce resources contribute to conflict and cooperation within and among countries.	SS-Geo.9-12.23. Content Anchor Standard: Analyze Global Interconnections Analyze the consequences of human-made and natural catastrophes on global trade, politics, and human migration.
SS-Geo.9-12.24. Content Anchor Standard: Iowa History Identify and evaluate Iowans or groups of Iowans who have influenced Iowa's environmental or cultural geography.	SS-US.9-12.17. Content Anchor Standard: Analyze Human Population Movement and Patterns Explain the patterns of and responses to immigration on the development of American culture and law.	SS-US.9-12.18. Content Anchor Standard: Analyze Human Population Movement and Patterns Analyze the effects of urbanization, segregation, and voluntary and forced migration within regions of the U.S. on social, political, and economic structures.

SS-US.9-12.19. Content Anchor Standard: Analyze Global Interconnections Examine how imperialism changed the role of the United States on the world stage prior to World War I.	SS-US.9-12.20. Content Anchor Standard: Analyze Global Interconnections Analyze the growth of and challenges to U.S. involvement in the world in the post-World War II.	SS-WH.9-12.17. Content Anchor Standard: Analyze Global Interconnections Evaluate the consequences of human made and natural catastrophes on global trade, politics, and human migration.
SS-WH.9-12.18. Content Anchor Standard: Analyze Global Interconnections Assess impact of conflict and diplomacy on international relations.	SS-WH.9-12.19. Content Anchor Standard: Analyze Human Population Movement and Patterns Explain the influence of human migrations on patterns of settlement and culture.
